This is in response to Applicant amendment filed on April 13, 2006.

Status of Claims

Claims 1-17, 19-32, 34-47 are pending. Claims 18 and 32 are cancelled.

Response to Arguments

Applicant's arguments filed on the aforementioned date have been fully considered but they are not persuasive. Therefore, the rejection of claim 43 remains

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., arranging the multimedia type information, object location information and multimedia control information to indicate timing for the multimedia objects referenced by the first set of one or more elements) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2161

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 43 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen et al. U.S. Patent no. 5,367,621 in view of Wan U.S. Patent no. 2004/0024898 A1.

As per claim 43, Cohen et al. disclose "One or more computer-readable media carrying data structures comprising: a first document formatted in a textual markup language having a plurality of tagged elements responsive to events, and a second document formatted in a textual markup language having a plurality of tagged elements; at least some of the tagged elements of the second document referencing the events affecting the tagged elements of the first document" (See Abstract; Col. 2, line 10-Col. 3, line 15).

Although Cohen et al. describes documents that are written in general markup language (GML) and style sheet; it is noted, however Cohen et al. did not specifically detail the aspects of documents that are written in XML as recited in the instant claims. On the other hand, Wan achieved the aforementioned claimed feature by providing a multimedia environment wherein multimedia documents are linked and written in XML (See Wan Title, Abstract; Pages 1-2, Paragraphs 0009-0024).

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the data processing method of Cohen et al. by substituting the link tags written in SGML with link tags written in XML, the motivation being to provide a multimedia data processing method including documents written in XML.

Allowable Subject Matter

Claims 1-17, 19-32, 34-42 and 45-47 are allowable over the prior art of record.

Claim 44 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record failed to teach a methodology for arranging the multimedia type information, object location information and multimedia control information to indicate timing for the multimedia objects referenced by the first set of one or more elements.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2161

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
